## V-STROM 650 ABS LEARNER APPROVED

The all-new V-Strom 650 ABS Learner Approved is the ultimate adventure touring machine built for learner riders. Packed with all the same features as the full-powered V-Strom 650 ABS but with a restricted engine output to 35kW to meet the Learner Approved Motorcycle Scheme requirements this is one machine, capable of doing it all.

\*Please note that ABS is a supplemental device for brake operation, not a device for shortening stopping distance. Always remember to reduce speed sufficiently before approaching curves and corners

# KEY FEATURES

## STCS

Inheriting the favoured traction control system from the V-Strom 1000, the new V-Strom 650 is also now equipped with this advanced technology. This system continuously monitors the front and rear wheel speeds, throttle position, crank position, and gear position with various sensors, and controls the engine output by managing the ignition timing and air delivery. The traction control system can be switched to either of two modes, or off.

## ABS

Equipped with 310mm diameter twin discs with twin two piston calipers on the front and a 260mm diameter single disk with a single piston caliper on the rear, the V-Strom 650 provides controllable and dependable stopping performance. Also the compact and light-weight ABS, to avoid wheel lock caused by excess hard braking, has been upgraded to the next generation with advanced settings for a further natural feel and secure activation.

## LOW RPM

## ASSIST

By adopting the new Low RPM assist system, the concern of an unexpected engine stall has been relieved. This system will automatically raise the idle speed when releasing the clutch or when riding at low rpms, assisting frequent clutch work in congested city rides and preventing sudden and unexpected engine stalling when riding in the low rpm range.

## EASY START

Conventional starter switches needed to be pressed by the rider until the engine starts, but the new V-Strom 650 and 1000 have adopted the Suzuki Easy Start System enabling the engine to start with one push of the button.

# KEY FEATURES

- › Suzuki's patented, Throttle-body Integrated Idle Speed Control (TI-ISC) stabilizes the engine idle speed and helps lower emissions. The system is compact and lightweight.
- › The Engine Control Module (ECM) provides state-of-the-art engine management and has enhanced settings to suit the intake and exhaust systems, resulting in better fuel economy and linear throttle response.
- › The compact radiator is flanked by new-style, wind directing plates that enhance cooling efficiency and direct heat out of the side vents away from the rider's legs.
- › The 6-speed transmission suits sporty rides with tight 1st through 5th gear ratios and a tall top gear (6th gear) for highway cruising.
- › Low-maintenance, long-life sealed O-ring drive chain is standard.
- › The new, spacious two-up seat combines smooth and slip-resistant surfaces, plus an embossed V-Strom logo.
- › New lightweight resin luggage rack incorporates easy-to-grasp grab bars and aligns with the passenger section of the seat offering a larger surface for carrying cargo or luggage.
- › Strong three-phase charging system supplies the 10Ah maintenance-free battery for easy starting and additional accessory power. A dedicated accessory fuse is located under the seat.
- › The new, stacked, 65/55W halogen headlamps illuminate the road when your ride stretches into night.
